McBill boarded the Claremont at West Twenty-third Street and made his way toward the pilot house. Capt. Osborne saw him coming, tocked the pilot house door and gave orders to cast off the lines.

The Inspector enjoyed the scenery as the boat went toward tilen island, but when off Clason Point Capt. Os-borne demanded to know by what

authority he was aboard, showed his shield.

"I don't recognize any but Federal authority." said the captain. "If you haven't paid your fare pay it or I'll throw you off the boat." McGill paid his fare. At Glen Island he jeft the boat and Capt, Os-borne refused to allow him aboard again. McGill went to New Rochelle by the ferry and returned to New York by train. He hadn't served the

SELLS the LARGEST SINGLE ORDER of **BAKING POWDER** ~

Here is a picture of a solid carload containing 30,708 pounds of Princine Pure Phosphate Baking Powder, SOLD to Seeman Bros., the great wholesale grocery house of New York. Here also is a reproduction of a telegram hurrying it forward. Their ninety traveling salesmen are now selling it to retail grocers to supply the demand.

> This is the largest single order of baking powder ever sold in New York, and yet before it arrived Seeman Bros. had sold over sixty per cent. of it to the retail trade.

In the South—the land of good home cooking—such orders for our Baking Powders are of every day occurrence, but in New York such orders for any baking powder have, heretofore, been unknown.

The fact that it has only been a few months since Princine was so highly endorsed by Alfred W. McCann in the Pure Food Directory of The Globe, is convincing proof that the people of New York are quick to appreciate its

rincine

to perfect the first can of Princine Pure Phosphate Baking Powder, but it is perfect. PRINCINE BAKING POWDER IS REMARKABLE IN MANY WAYS-

FIRST, in its great leavening power. It produces the lightest baking of all leavening agents. SECOND, it is the dryest baking powder in the world. A wonderful machine constructed at a cost of \$12,000 extracts the moisture. Therefore, it holds its strength until the pan is in the oven.

THIRD, for its great purity, and last, which should be first, for the helpful phosphates which it restores in part to overmilled flour. Princine Pure Phosphate used in Princine Baking Powder is prepared exclusively for the appearance. for this product.

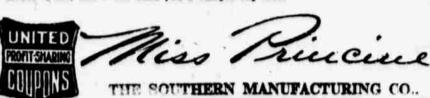

"PURE!"-SAYS McCANN. Mr. McCann of The Globe is not the only authority who fully endorses Princine Pure Phosphate Baking Powder.

"EXCELLENT!"-SAYS PROF. ALLYN OF WESTFIELD. Housewives who are using Princine are daily writing their appreciation to Miss Princine. This is the gist of their letters:

"I never produced such delicious baking as I have with Princine." If you haven't tried Princine Pure Phosphate Baking Powder, there is a baking revelation awaiting you.

Princine is put up in handy handle useful cups with sealed, airtight friction tops; easily opened, easily closed. Half pound, 15c; full pound, 50c. ASK YOUR GROCER TODAY.

If Princine hasn't reached your grocer, send his name and address direct to me, and I will send you a sample oup free.
